

What Needs to be Fixed with Carteret County's *Tall Structure Ordinance*

— **The Bullet Points** —

- Replace the three main conditions that were just removed
- Add a good Property Value Guarantee
- Increase Setbacks to 1 mile
- Have the Acoustical Limit be 35 dBA max
- Add Meaningful Environmental Tests
- Establish an Escrow Account
- To make waivers on any of the terms and conditions
requires a super-majority approval of the Commissioners

[We support a moratorium, while these are properly written.]

Point of Reference — [Ashe County's 2007 Wind Ordinance](#):

- It prohibit's industrial turbines over 199 feet
- It has an Acoustical Limit of 5 dBA over ambient

*There are dozens of studies by independent experts
supporting these regulations.*

See WiseEnergy.org/Carteret-wind for examples.
