[Note 1: Check out a worthwhile list of good AGW related books at [Cornwall Alliance](#).]

[Note 2: I have NOT read many of these well-regarded books, but from what I've heard I put some of the better ones in bold. Feel free to offer suggested improvements.]

[Note 3: Since a primary solution to AGW proposed by its advocates is wind energy, see this [book list](#) that explains why wind energy is a non-solution. The logical conclusions from this realization is that AGW proponents are not technically adept, **or** that they have an undisclosed agenda.]
