

## Some of What Needs to Be Fixed in the Three E's

### *Energy –*

Change national energy slogan to: “All of the Sensible”

Terminate special renewable subsidies (e.g. PTC and ITC)

End grid rules that give wind and solar favorable treatment

Cancel the “Clean Power Plan”

Eliminate (or fundamentally change) NREL

EIA do a much better job providing the cost of intermittent sources

Constrain FERC's unscientific bias towards renewables

Fix the NDAA so that military has better protections from turbines

Direct US nuclear plants to use reprocessed fuel

Fast-track Thorium (LFTR) & Small Modular reactors as energy sources

Approve Yucca Mt as an acceptable repository for used nuclear fuel

Substantially revise BOEM's (DOI) Renewable Energy mandate

End all ethanol subsidies and favoritism

Approve the Keystone XL pipeline (with appropriate protections)

### *Environmental –*

Appoint a balanced Science Committee to hash out the AGW issue

Send the Paris Agreement to the Senate for ratification

Make EPA's basis for Endangerment Findings genuinely scientific

Review and revise EPA's Greenhouse Gas Reporting Rule

Objectively calculate the *net* Social Cost of Carbon

Eliminate the Sea Level Rise provision in Biggert-Waters-12

### *Education –*

Substantially revise Common Core (with focus on real Science)

Pass a reasonable School Choice measure

Do a much better job with Vocational Education

Reduce federal funding to any college that politicizes Science

### *Across the Board on the 3 E's –*

All three of these federal agencies should be redefined and reduced

Review all recent Executive Orders/Memoranda. Change as needed

Require that all technical policies be genuinely Science-based

Weaken the influence of lobbyists on legislators

Reduce the reliance on computer models
