

What Needs to be Included in a Quality Wind Energy Ordinance

The ordinance's main objective is to protect the **Health, Safety and Welfare** of the community
(because that is a state constitutional mandate).

— A Wind Ordinance's Key Regulations —

- A well-written **Property Value Guarantee**
- **1 Mile (10x) Setbacks** from Turbines to Property Lines
- A **35 dBA Acoustical Limit** 24/7 at Property Lines
- **Meaningful Environmental Tests**
- Adequate **Decommissioning** Terms and Conditions

(Another important element is to have an **Escrow Account**.)

*There are dozens of studies by independent experts,
as well as numerous legal precedents,
that support these regulations.*

See WiseEnergy.org —> Key Documents, for examples.
